

Cardiac Arrhythmia Services

Cardiac Electrophysiology and Device Therapy

Collaborative Care & Communication

At Michigan Heart, we place great value on the partnership created with our patients, the referring physician and the broader community of medical resources. We believe decisions about the health of our patients must be made together, and that successful outcomes result from full-circle communication and contribution.

Our EP Program is a part of the advanced Heart Failure Clinic at St. Joseph Mercy Hospital in Ann Arbor, and works in close collaboration with the Heart Failure Programs at St. Mary Mercy Hospital in Livonia, and W.A. Foote Hospital in Jackson. This partnership allows us to draw on our shared knowledge and resources to provide the best care for our patients. Specifically, we research and use cardiac resynchronization therapy to relieve congestive heart failure symptoms by improving the coordination of the heart's contractions.

Ann Arbor Office
SJMHS Campus
5325 Elliott Drive
Suites 201-202-203
Ann Arbor, MI 48106
(734) 712-8000 (switchboard)
(734) 712-5200 (testing only)

Adrian Office
1548 W. Maumee Street, Suite C
Adrian, MI 49221
(517) 266-1042

Albion Office
27931 C. Drive North
Albion Mi. 49224
(517) 787-1234

Brighton Office

Michigan Heart

A Partner for Health.
A Partner for Life.

Cardiac electrophysiology (EP) is the division of cardiology that evaluates, diagnoses and manages heart rhythm disturbances. The Michigan Heart EP team is comprised of board-certified cardiac electrophysiologists, arrhythmia nurse practitioners, device nurse specialists and technologists completely dedicated to the care of patients with arrhythmias or implanted devices.

Our History

The EP program at Michigan Heart was founded in 1985, but historically has had a firm foundation in leading edge pacemaker therapy. The program has grown tremendously, paralleling the evolution and sophistication of the sub-specialty. Our five electrophysiologists combine to represent over 60 years of accumulated experience in the field. Each of the nurse practitioners evaluates and supports this often complex group of patients.

We are especially proud of our Arrhythmia Center's device follow-up clinic, one of the largest in the country. We are considered a model of exemplary care for patients with implanted devices, both regionally and nationally.

Research and Clinical Trials

Leading-edge research is fundamental in our approach to delivering the best treatment and device options for our patients. We participate in clinical trials involving pharmacologic and ablative interventions and device-mediated therapies for arrhythmia management.

The Patient Experience

At Michigan Heart, our patients receive state-of-the-art medical care that is compassionate and personal. We have created an atmosphere that is respectful and friendly for both the patient and their family, and we strive to care for the whole person, both body and mind.

Our Services

Michigan Heart's Cardiac Arrhythmia Services provide the full breadth of evaluation and treatment of complex arrhythmias in both the outpatient and inpatient settings.

These services include:

- ✦ Ambulatory monitoring including devices specifically designed for atrial fibrillation
- ✦ Outpatient and inpatient EP consultations
- ✦ Specialized Atrial Fibrillation Clinic
- ✦ Evaluation and treatment for the patient with syncope
- ✦ Device follow-up clinic for pacemakers, implanted defibrillators and implanted loop recorders
- ✦ Ablation therapy for SVT, WPW, atrial tachycardia, atrial flutter, atrial fibrillation and ventricular tachycardia
- ✦ Multi-modality 3D-mapping technology with CT/MR imaging guided transeptal approaches to left atrial ablation and pulmonary vein isolation
- ✦ Device-mediated heart failure treatments with coordinated follow-up with SJMHS Heart Failure Clinic
- ✦ ICD support group, clinical social workers and dedicated arrhythmia educational programs

Annual Volumes and Outcomes

- ✦ More than 550 Pacemaker procedures
- ✦ More than 300 ICD implants
- ✦ More than 130 Bi-ventricular heart failure devices
- ✦ More than 275 Ablations
- ✦ Quality outcomes exceeding national levels in all categories

To schedule an evaluation at Michigan Heart,
call 734.712.8000

Our experienced team of cardiologists, technologists and nurses are available to answer any questions you may have about this advanced technology.
